

Irrigation System and Landscape Water Efficiency Program

1. Sign up for a free Irrigation and Landscape Assessment

This is a basic assessment of residential and commercial irrigation systems and landscapes that will assess your irrigation system and landscape and provide recommendations on how to make it more water efficient. Sign up online at ourwatermatters.ca

2. Waterwise Landscape and Drip or Climate-Based Irrigation Controller Rebate

2A. Waterwise Landscape Rebate

The waterwise landscape component of the program will provide a \$250 rebate on waterwise plants, mulch and/or soil amendments with good quality compost providing that \$500 or more is spent by the homeowner and 50% of the landscape is replaced with waterwise materials. For ideas visit the following sites:

<http://www.growgreenguide.ca/>, <http://fraservalleyconservancy.ca/gardening-guide/>, and <https://www.ourwatermatters.ca>

- Sign up for a free assessment. Staff from the Irrigation Industry Association of BC will do an assessment and prequalify your landscape for a rebate.
- If approved, after the assessment purchase plants, compost and mulch and send the invoice along with the completed application in Schedule A to tvandergulik@watersustainabilitybc.ca. While Spring is the most popular time for gardening projects, the best time to establish a waterwise landscape is in the Fall.
- A minimum 50% of total landscape area must be improved using waterwise landscape material to qualify for the rebate.
- Plants that are purchased must be water wise and non-invasive. Native plants for the Fraser Valley climate are the best choice. The nursery you purchase from must sign off on your receipt stating that the plants are waterwise and non-invasive. You can find a list of plants that would qualify at these sites: <http://www.growgreenguide.ca/> and <http://fraservalleyconservancy.ca/gardening-guide/>.
- If a compost soil amendment is being applied for, the minimum thickness of the soil amendment for turf areas is 200 mm. For gardens and bed areas the minimum depth must be 400 mm.
- The homeowner will forward the completed application form in Schedule A along with proof of invoice payment for the plant material, mulch and/or compost to tvandergulik@watersustainabilitybc.ca
- Budget is limited, so the rebate is based on first come, first serve basis.
- An inspection may be required of the completed site prior to payment being made. **Application deadline for rebate is October 31 and work must be completed by November 30.**

2B. Drip Irrigation and/or Climate-Based Irrigation Controller Rebate

A \$250 rebate is available for the installation of drip irrigation that can be installed by the homeowner or a climate-based irrigation controller when installed by a Certified Irrigation Contractor.

- Sign up for a free assessment. Staff from the Irrigation Industry Association of BC will assess your irrigation system and will prequalify your system for a rebate.
- For drip irrigation if approved, purchase the drip material, install and send a photo with the application.
- For climate-based controller contact a certified contractor. Companies listed on the IIABC website that have a Certified Irrigation Scheduler on staff will be considered to be approved contractors. A list of approved contractors in the Lower Mainland is shown in Schedule B.
- Once the controller has been installed the homeowner will forward the completed application form in Schedule C along with proof of payment for the controller to tvandergulik@watersustainabilitybc.ca
- Budget is limited, so the rebate is based on a first come, first serve basis.

An inspection may be required of the completed site prior to payment being made. **Application deadline for rebate is October 31 and work must be completed by November 30.**

For questions on the program please call 604-864-5514 or email

Schedule A - Waterwise Landscape Rebate Application Form

To be completed by homeowner and emailed to tvandergulik@watersustainabilitybc.ca

Applicant Information:

Homeowner Name:	
Address:	
Utility Bill Account (Abbotsford):	
Phone Number:	
Email Address:	

Description of Project

Application must include a picture of the completed project with a brief description of the changes made. A visual plan or sketch of changes can also be attached to enhance application. Applicant must complete the table below indicating the proposed changes to the landscape material with the cost assigned to each change material. It is not required to fill in all areas. A minimum 50% of total area is to be improved by waterwise upgrades to receive the rebate.

Brief description of project:

Landscape Changes					
Plant Material		Estimated Cost	Soils Depth		Estimated Cost
Water Wise shrubs	<input type="checkbox"/>		Turf 200 mm	<input type="checkbox"/>	
Water Wise trees	<input type="checkbox"/>		Garden 400 mm	<input type="checkbox"/>	
Water Wise hedging	<input type="checkbox"/>				

Terms and Conditions

1. The applicant is the owner or authorized agent of the property listed above.
2. The listed address must be part of the Abbotsford Mission Water & Sewer Services (Abbotsford residents are to indicate their utility billing account number in the application).
3. Applicants must have been approved through an assessment prior to starting the project.
4. Applicant must submit all receipts totaling more than \$500 for materials.
5. A post-installation inspection may be required.
6. The Abbotsford Mission Water & Sewer Services is not responsible for the installation, performance or maintenance of converted landscape areas.

I declare that I have read and understood the above terms and conditions as well as the rebate program details listed on pages one and two.
